The Hale & Norcross Mine was an important claim located between the Savage and Chollar. Its discovery dates back to the beginning of the Comstock in 1859. In the late 1860s, William Sharon took control of the mine but wasn't receiving enough ore to see profits. That's when

the Bonanza firm (Mackay, Fair, Flood, and O'Brien) starting buying up shares to gain control. By 1869, they held enough shares to elect themselves on the board. Fair became superintendent. The mine paid dividends from 1869-1872, when it teamed with the Chollar-Potosi and Savage companies to sink the Combination Shaft. Fish was an early arrival in Nevada and was the first Grand Secretary of the Grand Lodge of Masons in Nevada in 1865. The Con Virginia works had just been destroyed by the great fire of 1875. This was issued on May 23, 1876. Although during the time of the big strike on the Comstock, this would have been at the very end. It was probably a case of investing too late to reap the rewards. **Lot # 1677** Nevada, Virginia City **Three Key Comstock Figures on One Check: Mackay, Flood, & Hobart** 1888 This is a fabulous check for Comstock history collectors. W.S. Hobart personal revenue check (RN-G), Nevada Bank of San Francisco, issued May 25, 1888 in San Francisco to Bonanza King John W. Mackay for \$1,411.65. Signed by Hobart. The reverse of the check makes it even more special: rather than being endorsed by Mackay, there are instructions to deposit it in the account of J.C. Flood! As one of the Bonanza Kings, James Clair Flood is rarely seen on documents. O'Brien and Flood were more silent partners and ran financial operations based in San Francisco while Mackay and Fair operated the mines in Virginia City. Flood and O'Brien

directly challenged William Sharon & William Ralston's Bank of California, eventually causing it to fail and forming the Nevada Bank of San Francisco. Flood died less than a year after this check was issued. W.S. Hobart was a

central figure on the Comstock, making his fortune in lumber (Sierra Nevada Wood & Lumber Co.), mines, mills (Ophir, Sapphire), and water (Virginia & Gold Hill Water Co.). Along with D.L. Bliss, Hobart's lumber operations at Lake Tahoe were essential to the Comstock's mining success. Hobart, Nevada, as well as Hobart Mills, California were both named after him. When the Virginia & Gold Hill Water Company reorganized in 1871, Hobart became a director along with Fair, Mackay, Flood & O'Brien. This check may represent business within this company. **Est. \$200 ~ \$400 HWAC# 43046**

Nevada,  
Wonder **Two  
Wonder Mill  
Photographs**

1) The Nevada  
Wonder Mill.  
Photo by Walter  
Browden. Photo

has some fading and is lifted a bit from mount. 2) View of Wonder, Nevada. Photo by Walter Browden. Faded, and torn in center. During the camp's first years several mining companies started operations but most of the district's yield came from the Nevada Wonder Mining Company, founded in September 1906. Eastern capitalists ultimately took over the company and began systematic development, especially after building a mill below the mine in 1913. Nevada Wonder's profitable career ended in 1919, and only leasers remained. Foundations, collapsed wooden buildings and dead locust trees mark the site. (From Stanley W. Paher's "Nevada Ghost Towns and Mining Camps") **Est. \$200 ~ \$300 HWAC# 39668**
